

HuronTel Windows 7 Internet Configuration Guide - Dialup

1. Close all program windows and start from the desktop. Click on **Start** -> **Control Panel**.
2. Click on **Network and Internet**.
3. Click **Network and Sharing Center**.
4. Click **Setup a new connection or network** in the **Change your network settings** sector.
5. Click **Connect to the Internet** and click **NEXT**.
6. Select **Connect using a dial-up modem** and click **NEXT**.
7. Enter the local dial-up number, normally **519-395-9095**, **519-529-9095**, or **519-371-6566**. Please note that due to the new 10 digit dialing regulations, you must prefix the number with the area code. **Make sure you do not put a "1" in front of the number in order to prevent long distance charges.** If none of these numbers are local to you, contact us at (877) 395-3800.
8. Enter your username and password into the appropriate boxes. Remember to turn your CAPS LOCK off, and use the TAB key to move between boxes. Do not press ENTER or you will lose information.
USERNAME: _____
PASSWORD: _____
9. Enter the connection name as HuronTel then click **Connect**. The computer should attempt to connect.
10. Go to <http://www.hurontel.on.ca/windows7mail.htm> for email setup instructions.

For Technical assistance, call our Support Line. (519) 395-3800 or (519) 529-3800

If you cannot dial either 519-395, 519-529 or 519-371 locally, please contact our Support Line for your local dial-up number.

Support Hours:
