Comtrend 3120 Residential Gateway Setup Instructions.

- Unpack your kit and connect the power cord to the modem.
- If you're on DSL or fibre to the node:
 - Connect phone cord from DSL port on back of modem to telephone jack at the wall
 - Connect wired computers to ETH ports 1-4. In the event you subscribe to our TV service, ETH 1 is reserved for Internet, ETH 2-4 are reserved for TV.
 - Power up the modem. It may reboot itself several times upon first power up, when the internet light turns green, your service is ready to use*.
 - Connect wireless devices using the credentials on the bottom of the modem

- If you are on Fibre to the Home
 - Connect an Ethernet cord from the ETH WAN port to the jack installed for your internet connection.
 - Connect wired computers to ETH ports 1-4.
 - Power up the modem. It may reboot itself several times upon first power up, when the internet light turns green, your service is ready to use*.
 - Connect wireless devices using the credentials on the bottom of the modem.

Locating the WiFi SSID and Security Key

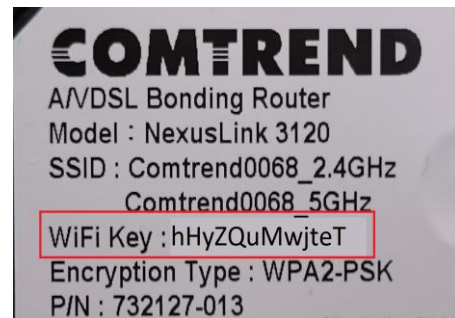

The SSID and Security Key for your network is unique and is based on the MAC address of your modem. The SSID will be HuronTelXXXX, where XXXX is the last 4 digits of the MAC address and the Security Key is printed on the bottom of the modem.

For Example:

Your 2.4Ghz SSID: HuronTel ___ _ _ _ 2.4GHz

Your 5Ghz SSID: HuronTel ___ _ _ _ 5GHz

Your WiFi Key: _____

SSID: HuronTel 0 0 6 8

Security Key: h H y Z Q u M w j t e T

**If the internet light does not turn green within 10 minutes, you will need to factory reset the gateway. With the power on, press and hold the reset button pictured above for 20 seconds. If the internet light still does not turn green after 2 minutes, call our support line.*

If you have received this modem as part of your service and would like wifi enabled, please call support:
